

# Q & A on Cal-Hypo Chlorine Tablets

## ***Are Calcium Hypochlorite tablet feed systems new ?***

No , Cal-Hypo Tablet feed systems have been around since 1990 in commercial pools. We have had experience with these systems dating back to 1995 with the PPG Accu -Tab system and now with the new PPG VersaChlor system

## ***Why are we seeing more of these systems now? Cl vs tabs***

Cal-Hypo tablet feed systems have always been more expensive than liquid chlorine systems, as an example . But over the years as technology has improved and safety has become a major concern Cal -Hypo feed systems can now be a cost effective alternative to liquid chlorine. Especially with the new generation of cal hypo feeders and tablets that we have been using and are now offering. But to compare the two side by side you must consider the total package of equipment parts and maintenance that a liquid chlorine system requires vs the Cal - Hypo tablet feed system.

## ***Who makes these systems?***

There are presently only 4 manufactures who make NSF approved Cal -Hypo tablets and feeders for commercial pools, Pool Doctors represents **two** of these manufactures.

## ***Is this the only type of pool sanitation Pool Doctors sells?***

No, We at Pool Doctors have always offered our customers a choice and have always looked for a better way for our customers to operate their pools. We have been delivering bulk chlorine since 1972. We petitioned the State, the same year,1972 to allow tri-chlor tablets for use on commercial pools. Pool Doctors offers more than just one chlorination system , We offer (6) , 1. Bulk Chlorine, 2. Tri-Chlor Tablets, 3. Bromine tablets , 4. (Salt) Chlorine Generation systems , 5. UV systems and 6. the Cal-hypo tablet system by two different manufactures.

## ***Will this Cal-Hypo save me money from my current system?***

That depends.. Since we offer more than one system to chlorinate your pool we can evaluate your needs and come up with the most cost-effective , the most maintenance-free or the safest way to chlorinate way based on your specific needs . Without being restricted to looking at only 1sanitizing product.

## ***I'm already on a Cal Hypo System. Why would I change from my current brand to a Pool Doctors Cal-Hypo tablet system?***

More Economical, Effective, Safe , Cleaner and Convenient , We have a better way! see attached info sheet

## ***Do you offer packages on these systems? .... Yes***
